## ***Course Description***

This course focuses on the development of artificial intelligence within the context of virtual environments games. Topics include fundamentals of virtual environment and game design and interfaces as well as common topics in AI specific to such environments. Techniques covered include problem-solving algorithms, turn-based decisions, and behavioral / decision-making techniques used to develop agents as characters. The course will focus not just on developing intelligent systems but also those that develop user interest / engagement to enhance user experiences.

## ***Course Pre-Requisites / Co-Requisites***

Prerequisite: COP 3530

## ***Course Objectives***

By the end of the semester, successful students should be able to:

- articulate critical elements of environment and game design and how they are applied in practice
- implement recognized problem-solving algorithms to solve a well-defined problem
- describe how problem-solving algorithms can be applied as decision-making behaviors
- combine simple steering behaviors to create fluid agent movement
- design agent decision-making behaviors using common industry frameworks
- create systems that are tailored for human rationality and expectations

## ***Required Textbooks and Software***

There are no required materials for this course. All materials will be provided by the instructor. The College of Engineering requires students to have a mobile computing device (laptop) capable of running Windows. Students are required to bring their mobile computing devices to class for in-class assignments!

## ***Recommended Materials***

- Artificial Intelligence for Games, Ian Millington, 2009, 2<sup>nd</sup> Edition, CRC Press
- The Art of Game Design: A Book of Lenses, Jesse Schell, 2014, CRC Press

## ***Attendance Policy, Class Expectations, and Make-Up Policy***

Attendance in classroom sections is mandatory and will be taken each class. Students are responsible for all information (including announcements) presented in class. Students who fail to attend lecture and/or discussion forfeit their opportunity to attend office hours unless the absence is excused by the instructor.

Projects and homework may be submitted late with a cascading deduction: one (1) business day late for 10% penalty; two (2) for 30% penalty; or three (3) for 50% penalty. Quizzes and tests may not be submitted late for credit except with instructor approval for extenuating circumstances. Excused absences must be consistent with university policies in the undergraduate catalog (<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>) and require appropriate documentation from a reputable source. For any planned event (such as a wedding), students must contact the instructor at least two weeks in advance for consideration. Please note that there is no guarantee that requests will be accommodated. Social, networking, and club events are considered at the discretion of the instructor. We will not make personal exceptions.

Grade reviews must be requested within one week of a grade being posted. After two weeks, no grade will be revisited. In the event of a grade review, the entire assignment will be reviewed.

Grades will not be “bumped up”, and no additional credit will be offered at the end of the term – so **do not ask!** Any request for a final grade increase, via “bumping” or “extra credit” **will result in a deduction of 1% of the student’s final grade.**

### Professionalism & Expectations

Students are expected adhere to the following guidelines in this course:

**Students should act with honor and honesty in all assignments.** Sharing / copying, “borrowing” of code structure, discussing code structure, looking at code from another student or providing such code, and plagiarism, in addition to other dishonest behaviors, are all considered academic dishonesty. Absolutely no information regarding assignment solutions may be shared by students except at a conceptual level. If students implement via inspiration from other sources, they must cite those sources. Students may not copy code from the Internet or other sources under any circumstances. Any student found to have violated these rules, whether a provider or receiver or unauthorized help, will be given a zero and referred to the Honor Court. **When in doubt, ask.**

**Please allow 48 business hours for a response by email** and remember that we will not respond to requests for project help. The instructor and TAs have many responsibilities and will respond to messages as is practical, but it can take some time, especially during the busy parts of the term.

### ***Students Requiring Accommodations***

Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, <https://www.dso.ufl.edu/drc>) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

### ***Course Evaluation***

Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at <https://gatorevals.aa.ufl.edu/students/>. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via <https://ufl.bluera.com/ufl/>.
